

Kingston HyperX H2O

kingston.com/hyperx

memory

Just add water.

Kingston Technology, the world's independent memory leader, proudly offers HyperX® memory for gamers and PC enthusiasts. HyperX modules are specifically engineered and tested for higher speeds and lower latencies. HyperX is available in five distinct product lines to meet the specific needs of everyone from the entry-level gamer to the seasoned pro.

Ideal for extreme gamers and PC enthusiasts, HyperX H2O is designed to deliver high speeds and extreme performance*. It features a unique extreme cooling option that uses nickel-plated brass pipes and liquid for maximum heat dissipation. HyperX H2O is available in DDR3 only and in speeds up to 2133MHz.

Like all Kingston® memory modules, HyperX H2O is 100-percent tested and backed by a lifetime warranty, 24/7 free technical support and legendary Kingston reliability.

Specifications:

- **Capacities** — 4GB – 6GB
- **Frequency speed** — 2000MHz–2133MHz
- **Operating Temperature** — 0°C to 85°C
- **Storage Temperature** — -55°C to 100°C
- **Dimensions** — 133.35mm X 30mm
- **DDR3 only**
- **Available in a variety of CAS Latencies**
- **JEDEC standard 1.5V ± 0.075V**

Features:

- **Features nickel-plated brass pipes for optional extreme water cooling solution**
- **Compatible** — tested with all popular brands of motherboards
- **Reliable** — 100% tested
- **Easy to install**
- **Guaranteed** — lifetime warranty, 24/7 live technical support
